COVER LETTER

Engaging in IT since childhood, working with games and computers, I began exploring web projects in high school in 2016. With nearly 5 years in the IT market, including 4 years as a full-stack developer, I've overseen diverse projects, spanning layout design, interfaces, and cloud-based Linux server infrastructures. Proficient in Typescript, ReactJS, and Node.js, I've also gained experience in design and marketing, enhancing my capacity to deliver exceptional and visually appealing user experiences.

WORK EXPERIENCE

● Full Stack Developer | Temporarily Tech Lead

Beuni Tecnologia: *Jun. 2022 - At the moment.*

Working within a lean team, amidst high client demand, and with a relatively nascent product in the corporate gifts and swag packs industry, I engaged in continuous discovery and benchmarking. Through this process, we developed a new product utilizing cutting-edge tools and expertise, delivering innovative solutions to our clients. This propelled rapid company revenue growth, leading to the successful acquisition of a pre-seed investment totaling 2.5 million BRL for the startup. Within a short period, I assimilated knowledge and assumed responsibility for spearheading product verticals, overseeing maintenance, and managing the technology team.

● Junior Developer (Full stack)

Onmai Innovations: *Jun. 2021 - Jun. 2022 (1 year).*

I had the autonomy to architect, build, and develop projects from scratch, encompassing deployment to production and subsequent maintenance. I developed projects aimed at problem-solving and streamlining internal processes. I created institutional websites and sales pages for company products. In these projects, I employed MVC architecture, utilizing Node.js with Express in the backend, PostgreSQL with Sequelize ORM for the database, and ReactJS with Redux and Redux-Saga (if necessary) in the frontend.

● Freelancer

Aotonomus: *Abr. 2021 - Abr. 2022 (1 year).*

I provided marketing consultancy services for local businesses, creating logos, websites, and sales pages using HTML5, CSS3, and Javascript, or utilizing the CMS WordPress. Additionally, I managed advertisement campaigns for companies using Facebook Ads.

● Marketing Advisor

Construtora Reobote: *Ago. 2020 - Mar. 2021 (8 months).*

I worked on developing marketing campaigns for real estate projects in the construction industry, overseeing the entire process from conceptualization/logo creation, material production, promotion, launch, to the sale of the final units.

● Technical support analyst

Onmai Innovations: *Jan. 2019 - Mar. 2020 (1 year and 3 months).*

I provided consultancy and technical support to company clients, ranging from large call centers and other operators to small businesses. I conducted commercial calls to present the company's software and services to potential clients. I assisted in maintaining and diagnosing the company's Linux servers (CentOS & Ubuntu) and those of clients, involving software log investigations, network monitoring, and server performance checks.

EDUCATION

● ETIM (Integrated Technical Education to High School) - Technical Degree in Computing

ETEC Dr. Domingos Minicucci Filho *2016 - 2018 (3 years).*

● Analysis and Systems Development - Technologist - Higher Education Course

Fatec - Faculdade de Tecnologia de Botucatu *2019 - 2023 (4 years).*
